

Appl. No. 09/936,627
Atty Docket No. 1085-031/JRD
Amendment Dated Dec. 1, 2004
Reply to Office Action of June 1, 2004

ABSTRACT

An educational tool, search tool or entertainment system is disclosed with one or more identification structures, with each identification structure associated with an item, a reader for detecting and interrogating the identification structure to identify the item associated therewith and a processor operable to react in a predetermined manner to the identification of a detected item. A related method for providing entertainment, educational information, or searching using the tool to provide information in response to the detected identification of an item is also disclosed.
